Colour in the animals you have seen in Antigua! Spot the Pigeon!

SEA URCHIN FACTS

Did you know that Sea Urchin means "Hedgehog"!

Sea Urchins come in a full range of colors from sand colored to bright pinks and dark purples.

Sea Urchins are omnivores. That means they eat both plants and animals.

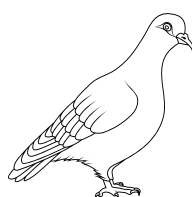

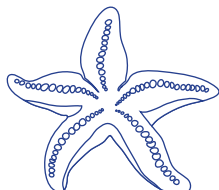

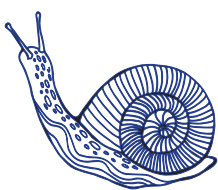

The body of a Sea Urchin has radial symmetry. That means that each Sea Urchin can be divided into five equal parts.

Sea Urchins can grow from 3cm up to 10cm.

Sea Urchins are related to Sea Stars, Sea Cucumbers, and Sand Dollars. Like their relatives, Sea Urchins do not have a brain or heart.

The red Sea Urchin has the longest lifespan on earth. It can survive up to 200 years in the wild.

Can you draw a Sea Urchin?
